GENERAL CHARACTERISTICS

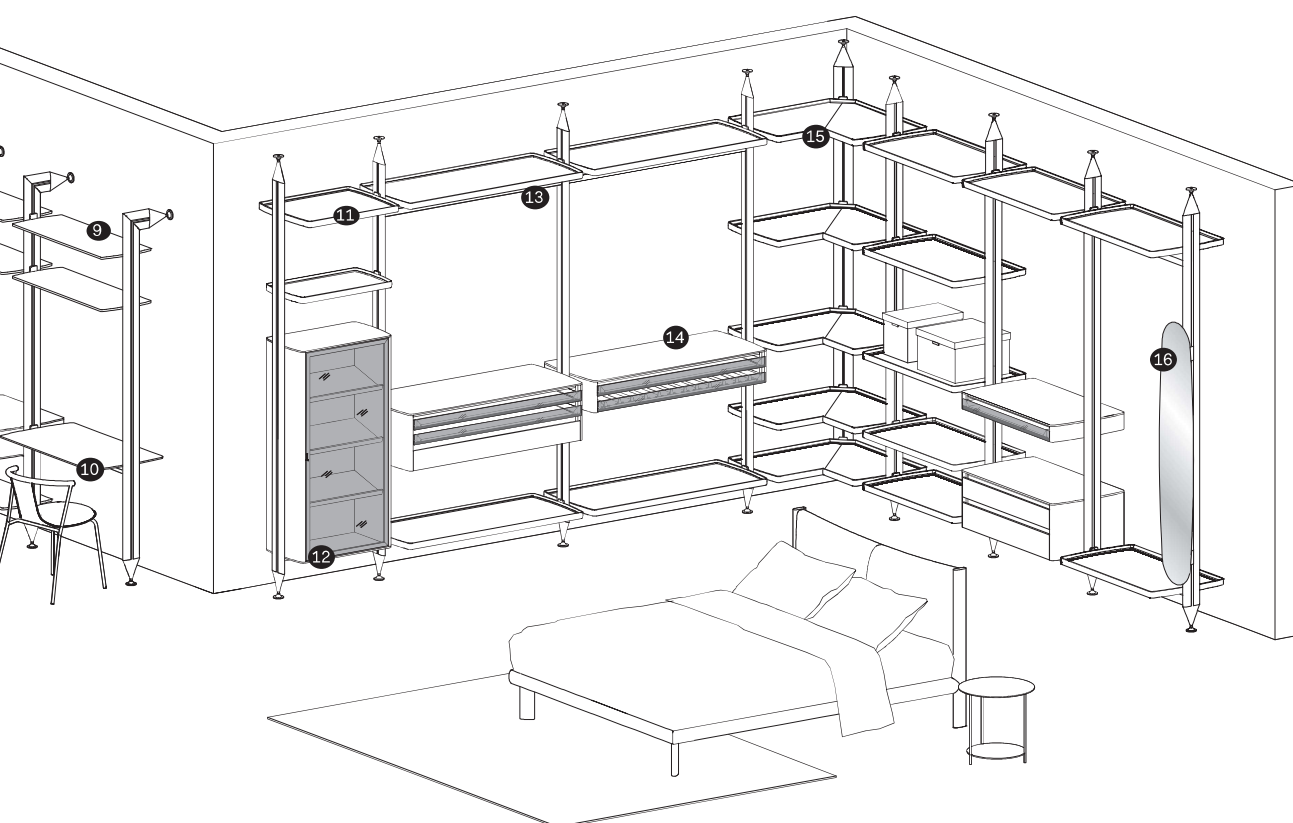

Dedalo equals endless design freedom. Our new Dedalo system, a clever and versatile combination of uprights designed to fit seamlessly into any interior: from the living area to the bedroom, and even offices spaces. The load-bearing structure uses wall- or ceiling-mounted uprights paired with shelves in smoked glass, leather, light stone, wood finishes and lacquered options set in an aluminium frame. These elements can be complemented with storage units, drawer units and other accessories to design walk-in wardrobes, room-dividing bookcases or whole storage walls, offering plenty of scope for customizing with different combinations and finishes. With Dedalo modules, which range in width, you also have the option of designing double-sided configurations, finished on both sides.

**OXIDIZED
LACQUERED**

306
Bronze

The oxidized lacquered finish 306 Bronze is the standard finish for:

- vertical uprights
- metal frame around shelves
- framed doors

In addition, this is the only finish option for feet (bottom and top), shelf and storage unit side supports, support bar under units or under 0,8cm shelves, underside of leather/light stone shelves/desk, rear of mirrors, walk-in wardrobe storage unit trays and hanging rails.

304
Light bronze

305
Pewter

363
Lunargento

The oxidized lacquered finish is composed of paint containing metal crystals. Any small shiny particles present on large surfaces should be seen as a distinctive feature of the finish.

**METAL
LACQUERED**

307
Copper

308
Brass

309
Brown

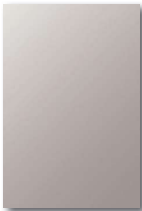

302
Tin

Finishes available for metal items only.

The metal lacquered finish serves up a special coating technique involving various coats of paint applied entirely by hand that are combined to achieve a metallic effect. This is a handcrafted product, and is therefore unique, meaning any differences in colour or in gloss level on different surfaces should be seen as a distinctive feature of the finish.

**STANDARD
TOUGHENED
GLASS**

C80
Smoked

**PLUS
TOUGHENED
GLASS**

C81
Stop-sol

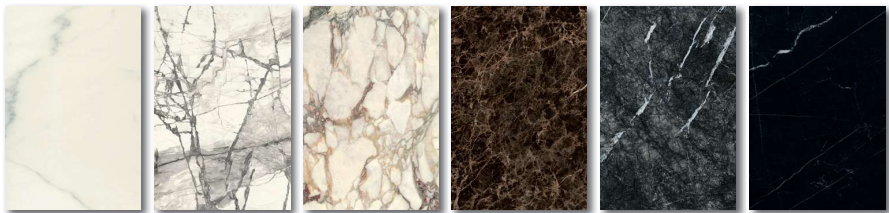

Finish option for storage unit internal shelves and pull-out frame fronts.

Refer to the pages inside the price list to check what finishes are available for each item.

Printed samples used to illustrate finishes and colours may not represent the true colour; they are given as a rough guide only and may not match the product actually sold.

USE AND CARE INSTRUCTIONS

Please find below some useful tips on how to care for the product and keep it looking its best.

CHANGES IN SHADE AND COLOUR

Lacquered colours and veneers can be susceptible to colour change over time and hence, when ordering new pieces to match existing units, any difference in colour shall not constitute cause for complaint.

It is also advisable to position furniture away from strong sources of heat and out of direct sunlight.

HOW TO CLEAN SURFACES IN GENERAL

Use a soft cloth (moistened where necessary). Do NOT, under any circumstances, use abrasive products, solvents, thinners, alcohol or corrosive products. Do not leave wet cloths touching surfaces.

HOW TO CLEAN GLASS

Use a soft cloth and glass cleaner. Do NOT, under any circumstances, use abrasive products, solvents, thinners, alcohol or corrosive products.

ELECTRICAL ACCESSORIES

All such accessories come with "CE" marking attesting to their compliance with EEC directives (EEC 72/23, EEC 89/336). In addition, they meet Italian CEI electrical safety standards (CEI 34-21 and EN 60598.1).

Each pack comes with an assembly instruction sheet featuring the system's technical specifications and essential installation procedure, which is to be carried out, whatever the case, by qualified personnel only.

TECHNICAL INFORMATION

FLOOR-TO-CEILING DEDALO

WALL-MOUNTED DEDALO

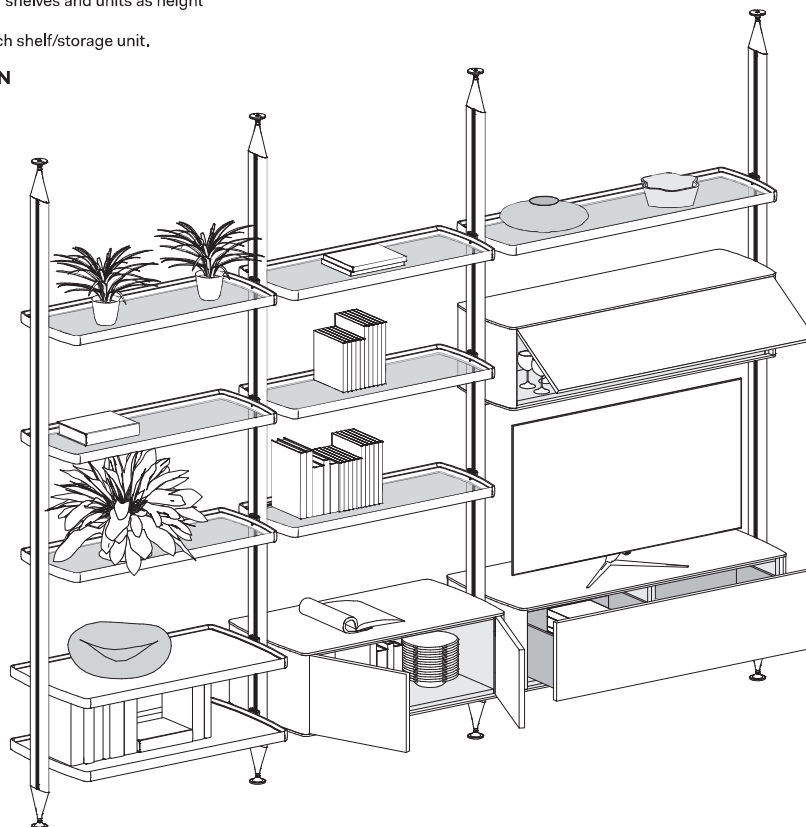

COMPONENTS	THICKNESS
DEDALO UPRIGHTS: extruded aluminium structure with aluminium covers that are either lacquered or faced with wood.	2 cm
DEDALO 4cm SHELVES: lacquered aluminium frame around shelves with noise seal around edges with inserts. Shelf insert:	
- GLASS: toughened glass panels	0,6 cm
- PANEL: lacquered or veneered particleboard	1,2 cm
- LIGHT STONE: light stone and sheet metal painted in bronze	0,6 +0,1 cm
- LEATHER: reconstituted leather with matching stitching and sheet metal painted in bronze	0,4 + 0,1 cm
DEDALO 0,8cm SHELVES: lacquered or veneered shaped particleboard.	0,8 cm
STORAGE UNIT OUTER SIDE PANELS: veneered or lacquered shaped MDF panels.	4 cm
TOPS: veneered or lacquered shaped particleboard.	0,8 cm
DOORS: veneered or lacquered particleboard.	2,2 cm
RAYS DOORS: veneered or lacquered pressed wood.	2,2 cm
FRAMED DOORS: extruded aluminium frame either lacquered or faced with wood with 0,4cm toughened glass panels with noise seal around edges or 1,2cm veneered particleboard/lacquered panels, or sheets of Light stone 0,6 cm thick + 0,5cm particleboard.	2,6 cm
DRAWERS: veneered or lacquered particleboard fronts. QUADRO® - SILENT SYSTEM® full-extension runners.	2,2 cm
DRAWERS WITH PULL-OUT FRAME: 1,2cm veneered or lacquered particleboard or 0,6cm smoked glass fronts. Structural aluminium frame powder coated in bronze finish with full-extension soft-close runners that slide out of view inside frame.	0,6 / 1,2 cm
STORAGE UNIT INTERIOR CARCASS: foil-wrapped particleboard.	1,8 cm
OPTIONAL PANELS FOR FINISHED REAR: veneered or lacquered particleboard.	1,2 cm

ASSEMBLY AND SAFETY NOTES

DEDALO is a light structure and, as such, is not designed to support heavy loads. Most items should be stored at the bottom of the unit, with progressively lighter items placed on upper shelves and units as height increases.

Never exceed the rated load capacity of each shelf/storage unit.

EXAMPLE OF LOAD DISTRIBUTION

4cm SHELF LOAD CAPACITY

W cm	Glass/ Wood	Light stone	Leather
55,3	20 kg	20 kg	6 kg

100,3	5 kg*
130,3	5 kg*

*per the specifications given on each storage unit.

All values refer to evenly distributed loads.

ASSEMBLY NOTES

Uprights come ready assembled and with fittings for attaching shelves and storage units in the positions specified when the order was placed. Storage units come ready assembled

NOTES ON SAFETY

Uprights are designed for compulsory attachment to ceiling or wall. The person mounting the unit is responsible for choosing appropriate fixings based on the type of wall/ceiling and the customer's intended use.

ILLUSTRATION OF DEDALO STORAGE UNIT OPENING SYSTEMS

STORAGE UNITS WITH PULL-OUT FRAME D 53 cm

DESIGN INSTRUCTIONS

The Dedalo system comes with all the fittings already attached to the uprights required for installing shelves, storage units and accessories, based on the configuration ordered. Furthermore, when ordered with vertical lights, the unit also comes with the lighting already fitted.

This simplifies and speeds up the assembly procedure considerably, ensuring components are aligned to the millimetre, in keeping with the systems' functional and aesthetic rationale.

For this distinctive trait of the Dedalo system to be possible, positions have been set at "standard intervals" and we recommend keeping to them when designing the configuration. These positions — which are given on the diagram indicating module sizes — correspond to the heights above the floor at 32 cm intervals, with further half intervals of 16 cm also accommodated.

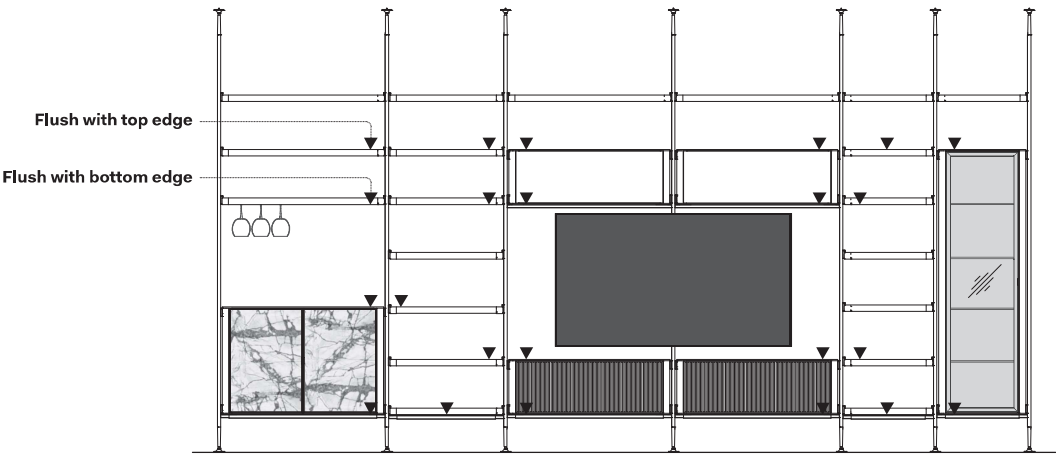

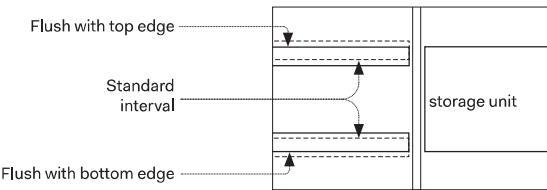

When adding lighting (see coming pages), a horizontal element (shelf or storage unit) must be included at a height of around 22 cm above the floor in each bay: this component serves to conceal the wiring and house the transformers inside special raceways.

While technically possible when it comes to assembly, moving the elements to different heights is discouraged as the resulting solution might be slightly less aligned with the system's functional and aesthetic criteria.

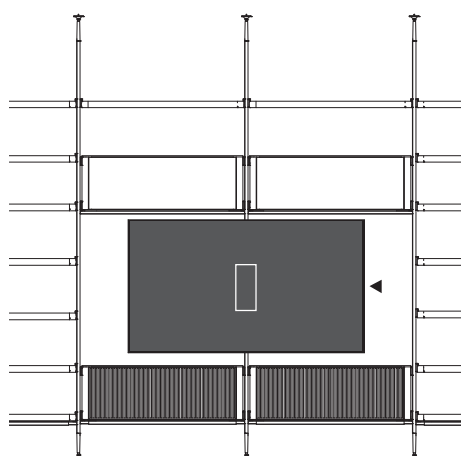

To make the design process and handling orders easier, we recommend using our software, which is designed to help you both configure the unit and prepare the relevant quote.

Aligning shelves with storage units

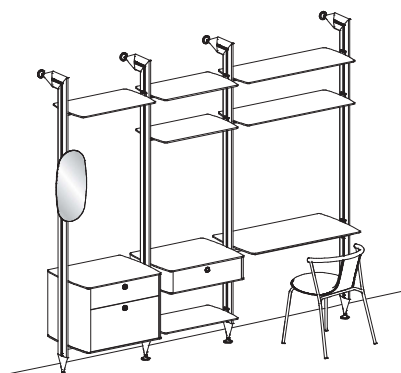

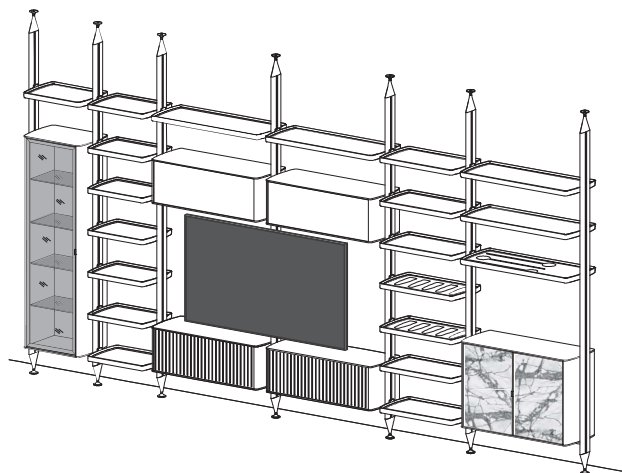

Shelves must be aligned with the upper surface (flush with top edge) or underside (flush with bottom edge) of the storage units they are being placed next to.

Examples of positioning

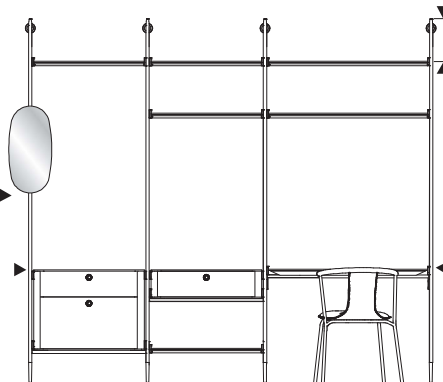

The TV mounting bracket comes attached in the middle of the relevant bay.

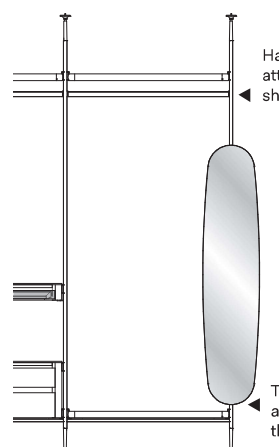

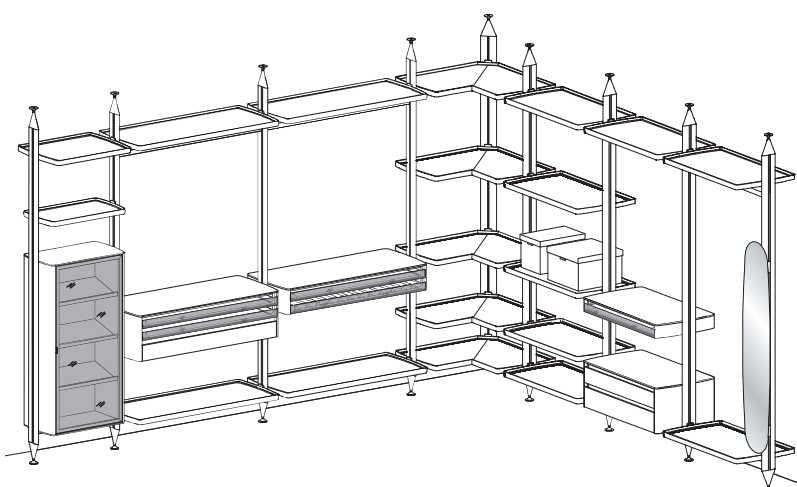

The small mirror's fittings are attached so it is 120 cm above the floor.

The maximum height off the floor of 53cm-deep storage units is 120,7 cm flush with the top edge.

The top 25 cm of the wall-mounted upright must be left bare.

The writing shelf fittings are attached 73 cm above the floor.

Hanging rail fittings are attached 10 cm below the top shelf.

The large mirror's fittings are attached so it is 30 cm above the floor.

LIGHTING

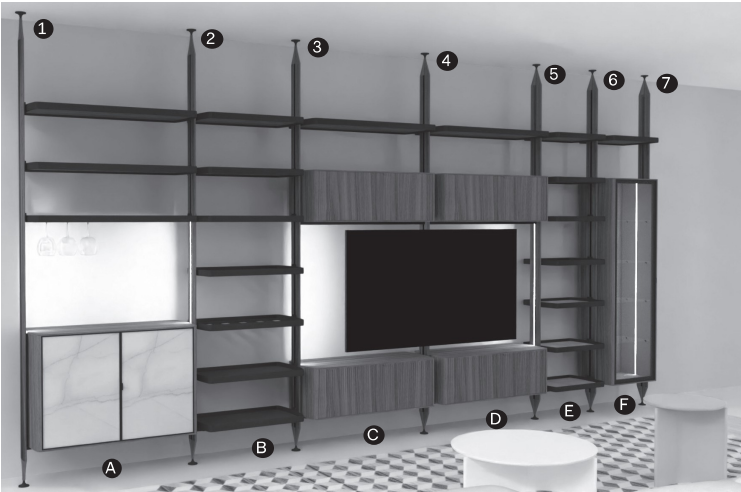

The Dedalo system gives the option of incorporating lighting into floor-to-ceiling uprights using **full-height vertical LED strips** with direct power supply (with cable entry from below).

Alternatively, using power tracks built into the floor-to-ceiling or wall-mounted uprights (with cable entry from below or, on request for floor-to-ceiling uprights only, from above), other lighting configurations are possible, such as:

- **partial vertical LED strips** to illuminate just one portion or a number of portions of the vertical uprights, on one or both sides;
- **LED lighting inside** 38,6/53cm-deep storage units, to be positioned horizontally on the inside of the top cover or vertically down one or both sides of the storage unit;
- **horizontal lighting under 38,6/53cm-deep storage units** built into the special support bar fitted for this purpose (optional extra) instead of the standard bar;
- **horizontal lighting under 0,8cm shelves**, built into the support bar, which is included on this kind of shelf and which is designed to accommodate lighting (light optional extra).

The whole system has been designed to ensure all wiring and transformers required to operate the lighting are concealed from view as much as possible.
For this purpose, the system requires a horizontal element (shelf or storage unit) to be fitted 22 cm above the floor in each bay.

Examples of lighting and wiring

DEDALO floor-to-ceiling configuration with partial lighting incorporated into the bay on the left, into the central bay housing the TV mount and inside the storage unit with framed door on the right.

Uprights 1/2/3/5/6/7 incorporate 1 power track, which supplies power to the lights connected to them: LED strip H64 cm on uprights 1 and 2, LED strip H96 cm on uprights 3 and 5 and light inside storage unit H161,6 cm on left side connected to upright 6 and on right side connected to upright 7.

To conceal the wiring, horizontal elements are installed 22 cm above the floor, with the addition of cable raceways on all bays.

This setup requires 3 transformers, which are housed in the raceways on bays A (to supply power to the power tracks on uprights 1 and 2), C (to supply power to the tracks on uprights 3 and 5) and F (to supply power to the tracks on uprights 6 and 7), and are all connected together in a chain.

The power supply on the wall can be at any point aligning with the bays.

For details on which part numbers to order, see page 34.

Floor-to-ceiling DEDALO configuration with lighting ordered on all uprights and inside storage units.

Uprights 1 and 3 incorporate 1 power track each; upright 2 incorporates 2 tracks supplying power to the lights connected to them: LED strip on uprights 1, 2 and 3 and lights inside storage units connected to uprights 1 and 2.

Power can be supplied to the power tracks by means of 2 transformers housed inside a special purpose-made cavity in the ceiling, with the 24V cables exiting to meet the top of each upright and used to supply power to the 4 power tracks.

Alternatively, if the power cable enters from below, 2 raceways must be fitted under the storage units, to be set 22 cm above the floor, to house the 2 transformers.

For details on which part numbers to order, see page 34.

DEDALO configuration with full-height lighting incorporated into all wall-mounted uprights.

Wall-mounted uprights 1 and 4 incorporate 1 power track each; wall-mounted uprights 2 and 3 have 2 tracks that supply power to the lights connected to them: 6 full-height LED strips.

To conceal the wiring, horizontal elements are installed 22 cm above the floor, with the addition of cable raceways on all bays.

This setup requires 3 transformers, which are housed in the raceways on bays A (to supply power to the power tracks on uprights 1 and 2), B (to supply power to the tracks on uprights 2 and 3) and C (to supply power to the tracks on uprights 3 and 4), and are all connected together in a chain.

The power supply on the wall can be at any point aligning with the bays.

For details on which part numbers to order, see page 35.

FINISHES AND
GENERAL
INFORMATION

DEDALO
COMPONENTS

Floor-to-ceiling DEDALO configuration with full-height lighting ordered on all uprights and inside the storage unit with framed door located on the left.
NB: no lighting is required on the rear upright in the corner.

Uprights 1 and 2 on the left-hand side incorporate a power track, which supplies power to the lights connected to them: 2 full-height LED strips and light inside 129,6cm-high storage unit on left side connected to upright 1 and on right side connected to upright 2.

All the other uprights (3, 4, 5, 6, 7, 8 and the right-hand side on number 2) instead have 10 full-height vertical LED strips with direct power supply.

To conceal the wiring, horizontal elements are installed 22 cm above the floor, with the addition of cable raceways on all bays except the corner.

This setup requires 6 transformers, which are housed in the raceways on bays A (to supply power to the power tracks on uprights 1 and 2), B and C (to supply power to the full-height lighting on uprights 2, 3 and 4), and D, E and F (to supply power to the full-height lighting on uprights 5, 6, 7 and 8), and are all connected together to form 2 chains, one for the left-hand part and one for the right-hand part.

The power supply on the wall can be at any point aligning with the bays associated with the 2 chains.

For details on which part numbers to order, see page 35.

LIGHTS

Full-height vertical LED strip

24V 3000K

LED lighting, 0,6 cm thick, comes in the floor-to-ceiling upright's standard full-height sizes.
Each upright can have 1 or 2 LED strips (one per side),

Cable entry is always from below.
For custom uprights, the light comes cut to size at no extra cost.

The use of full-height LED strips does not allow for other types of lighting to be added to illuminate storage units or 0,8cm shelves, which requires the power track.

To be finished off with transformer and accessories, if any, based on the ON/OFF control system chosen.

	H cm	Watts	Code	Price for 1 side
Floor-to-ceiling upright	276	25	EV7584	165
	331	30	EV7585	175

Power track

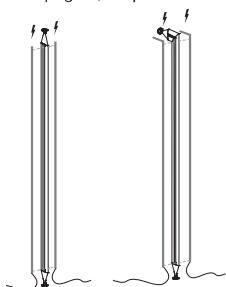

24V

0,6cm-thick metal profile, which comes in standard full-height sizes, designed to electrify the upright to supply power to partial vertical LED lighting, LED lighting inside storage units, horizontal LED lighting under storage units and/or under 0,8cm shelves.

Each upright can have 1 or 2 power tracks (one per side).

Cable entry is always from below. On request, for floor-to-ceiling uprights only, cable entry can be from above.

For custom uprights, the power track comes cut to size at no extra cost.

To be finished off with transformer and accessories, if any, based on the ON/OFF control system chosen.

	For H cm	Code	Price for 1 side
Floor-to-ceiling upright	276	EV7694	65
	331	EV7695	77
Wall-mounted upright	227,5	EV7691	89
	259,5	EV7692	94
	315	EV7693	100

Full-height LED strip for power track

24V 3000K

For wall-mounted uprights with power track only.

LED lighting, 0,6 cm thick, comes in the wall-mounted upright's standard full-height sizes.

Each upright can have 1 or 2 LED strips (one per side).

The light is attached to the power track magnetically (no wires).

The bottom 2 cm of the light incorporates the power cable entry (non-lit).

For custom uprights, the light comes cut to size at no extra cost.

	For H cm	Watts	Code	Price for 1 side
Wall-mounted upright	227,5	23	EV7591	177
	259,5	26	EV7592	183
	315	32	EV7593	207

Partial LED strip for power track

24V 3000K

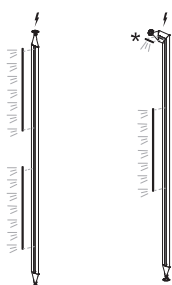

For uprights with power track only.

LED lighting, 0,6 cm thick, comes cut to the required length based on the height of the bay to be lit.

The light is attached to the power track magnetically (no wires).

Several lights can be connected to the same track within the limits of the transformer connected.

The bottom 2 cm of the light incorporates the power cable entry (non-lit).

Minimum size L 20 cm
Maximum size L 300 cm

The partial LED strip can also be used for full-height solutions in conjunction with power tracks.

In this case, the relevant dimensions are:

- for floor-to-ceiling uprights: upright H - 36 cm
- for wall-mounted uprights: upright H - 26,2 cm

	Watts per linear m	Code	Price
per linear m	10	EV7572	89

Minimum amount charged is 1 linear metre: for shorter lengths, apply the price for 1 metre.

	Watts	Code	Price
*Wall-mounted upright horizontal light	2	EV7573	35

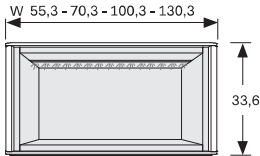

LIGHTING

For uprights with power track only.

The inside of the storage unit or compartment underneath can be illuminated using the relevant support bar fitted with a light. The interior LED lighting, 0.6 cm thick, comes with the lighting strip recessed into the storage unit carcass so that it is "flush". The options are horizontal or vertical lighting, as featured below.

Horizontal LED light inside storage units

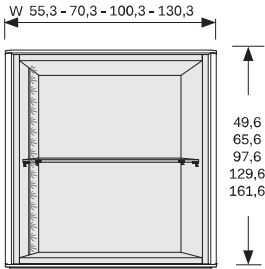

24V 3000K
on the inside of the top cover (in the middle) for storage units 33,6 cm high only.
The left upright must be fitted with a power track.

For W cm	Watts	Extra charge per light (comes ready attached)
55,3	4,2	+ 57
70,3	5,7	+ 60
100,3	8,7	+ 73
130,3	11,3	+ 92

Vertical LED light inside storage units

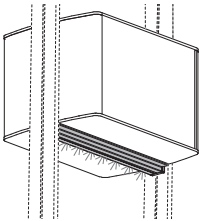

24V 3000K
on the inside of the vertical side of just one side panel (LH or RH) or of both side panels (in the middle) for all storage units except units 17,3 and 33,6 cm high.
The upright next to the side panel with the light must be fitted with a power track.

For H cm	Watts	Extra charge per light (comes ready attached)
49,6	6	+ 58
65,6	8	+ 63
97,6	9	+ 74
129,6	12,6	+ 96
161,6	15	+ 118

Horizontal LED light under storage unit

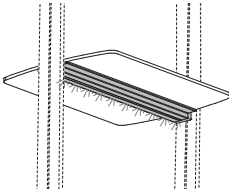

24V 3000K
The extra charge includes the LED strip and replacement of the standard support bar with a special one for the LED strip.
The LED strip can be added under all storage units except those fitted with the cable raceway.
The compartment below cannot have partial vertical lights on the upright and the storage unit above cannot have lighting inside.
At least 1 upright on the right or left must be fitted with a power track.

W cm	Watts	Extra charge for LED light and relevant support bar
55,3	4,2	+ 116
70,3	5,7	+ 144
100,3	8,7	+ 199
130,3	11,3	+ 211

Horizontal LED light under 0,8cm shelf

24V 3000K
At least 1 upright on the right or left must be fitted with a power track.
The LED strip can be added under all 0,8cm shelves except those fitted with the cable raceway.
The compartment below cannot have partial vertical lights on the upright.

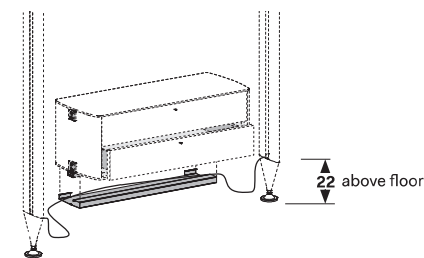

For W cm	Watts	Extra charge per single light
55,3	4,2	+ 48
70,3	5,7	+ 59
100,3	8,7	+ 77
130,3	11,3	+ 80

ACCESSORIES

Cable raceway

Metal in 306 Bronze finish.
To be attached to support bar.
Conceals and houses the transformers and cables required to supply power to lighting.

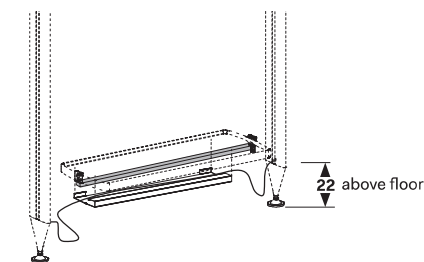

W cm	m²	Code	306 Bronze
55,3	0,001	ELD531	26
70,3	0,001	ELD532	28

SMART TRANSFORMERS

SMART transformer

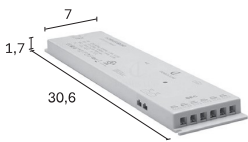

24V transformer for LED lighting.
Always supplied ready to accommodate an optional control module.

On request, transformers can be provided with plugs and certification for the world's main markets.
2-metre power cable (black).

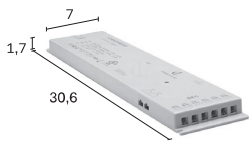

30W SMART transformer

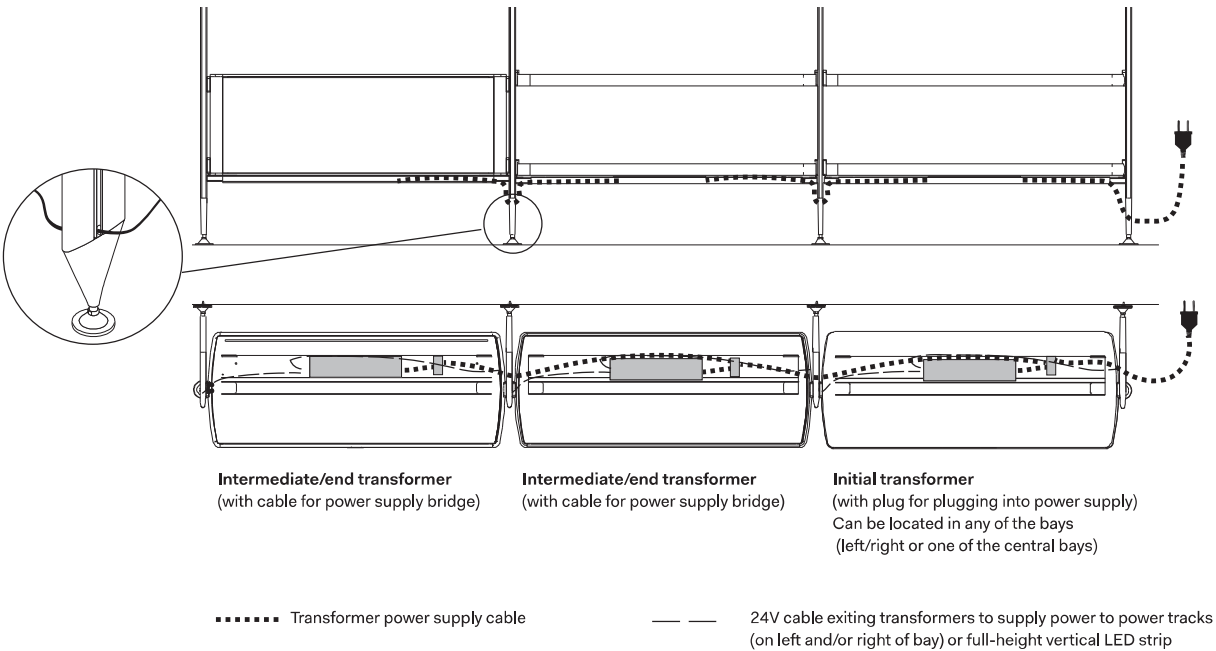

60W SMART transformer

96W SMART transformer

How to choose the transformer

Initial transformers

	lights	Code	Price
30W SMART transformer	max. 6	EV7605	113
60W SMART transformer	max. 6	EV7606	160
96W SMART transformer	max. 6	EV7607	219

Intermediate/end transformers

	lights	Code	Price
30W SMART transformer	max. 6	EV7608	113
60W SMART transformer	max. 6	EV7609	160
96W SMART transformer	max. 6	EV760A	219

Control modules

Choose the module for the ON/OFF control system you want.

	Code	Price
Bluetooth module	EV7651	42
Wi-Fi module	EV7652	72
Module for remote control	EV7654	31
Module for wireless switch	EV7655	41

ON/OFF CONTROL SYSTEMS

Switch-on via REMOTE CONTROL

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, from up to 14 metres away. Controls an unlimited number of SMART transformers.

Single channel for controlling all transformers together (unlimited).

	Code	Price
Single-channel remote control	EV7663	61

Multi-channel (max. 3) for controlling different transformers (example: 3 bays with lights that can be controlled in a different way for each bay); each channel can have an unlimited number of transformers.

Each SMART transformer you plan to control must have a module for remote control.

	Code	Price
Multi-channel remote control	EV7662	87

Switch-on via wireless SWITCH

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, from up to 25 metres away. Controls an unlimited number of SMART transformers. Battery-free operation.

Single channel for controlling all transformers together (unlimited). Dimensions: 8,6 cm x 8,6 cm

	Code	Price
White single-channel wireless switch	EV7664	57
Black single-channel wireless switch	EV7667	57

2-channel for controlling 2 groups of transformers. Each channel can have an unlimited number of transformers. Dimensions: 8,6 cm x 8,6 cm

Each SMART transformer you plan to control must have a wireless switch module.

	Code	Price
White 2-channel wireless switch	EV7665	68
Black 2-channel wireless switch	EV7668	68

Switch-on via BLUETOOTH and WI-FI

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, straight from a smartphone or tablet using the relevant app. Depending on the technology used (Bluetooth or Wi-Fi), all available functions can be used.

Using Bluetooth technology, you can switch lights on and off and control the lighting level straight from your smartphone or tablet. The app can be installed on a number of devices, but only allows lights to be controlled by 1 of these at a time. Up to 5 Bluetooth modules can be paired with the app.

Each SMART transformer you plan to control (max. 5) must have a Bluetooth module.

Using your home's Wi-Fi network, you can switch lights on and off and control the lighting level straight from your smartphone or tablet using the relevant app. In addition, the transformer interfaces with Amazon Alexa or Google Home voice-control devices.

The app is free and available for all mobile operating systems.

Each SMART transformer you plan to control must have a Wi-Fi module.

EXAMPLES OF WIRING

Example 1

DEDALO configuration H270 as pictured.

- For lighting , you will need to factor in:**
- 6 EV7694 power tracks for uprights 1/3/6 (RH side), 2/5/7 (LH side)
 - 2 EV7572 partial LED strips for bay A H66,4 cm (approx. 64 cm) 7W each
 - 2 EV7572 partial LED strips for TV compartment H95,9 cm (approx. 96 cm) 10W each
 - 2 extra charges for LED lights inside storage units for H161,6 15W each
- For the power supply, you will need to factor in:**
- 1 EV7606 initial 60W SMART transformer (bay F)
 - 2 EV7608 intermediate 30W SMART transformers (bays A and C)
- This example assumes there is a power socket on the RH side of the configuration.

- To conceal wiring, you will need to factor in:**
- 1 ELD531 Cable raceway for bay F
 - 1 ELD301 + ELD531 Bar and cable raceway for bay E
 - 3 ELD534 Cable raceways for bays A, C, D
 - 1 ELD302 + ELD532 Bar and cable raceway for bay B

- Depending on the preferred control method, you will need to factor in the following optional ON/OFF/control system components:**
- **control via mobile/tablet app:**
 - 3 EV7651 Bluetooth module
 - 3 EV7652 Wi-Fi module
 - or
 - **remote control:**
 - 3 EV7654 Module for remote control
 - 1 EV7663 Single-channel remote control
 - or
 - 1 EV7662 Multi-channel remote control for switching ON/OFF/controlling 3 lighting zones separately

Example 2

DEDALO configuration H270 in middle of room as pictured.

- For lighting , you will need to factor in:**
- 4 EV7694 power tracks for uprights 1 (RH side), 2 (LH/RH sides), 3 (LH side)
 - 4 EV7572 LED strips for power track H227,9 (approx. 270-36 cm)
 - 2 extra charges for LED lights inside storage units for W 100,3

- For the power supply, you will need to factor in:**
- 1 EV7607 initial 96W SMART transformer (bay A)
 - 1 EV760A intermediate 96W SMART transformer (bay B)

- To conceal wiring, you will need to factor in:**
- 2 ELD534 Cable raceways for bays A and B
- Alternatively, on request, the transformers can be housed inside special purpose-made ceiling cavities, with the 24V cable designed to feed out to meet the top of each floor-to-ceiling upright

- Depending on the preferred control method, you will need to factor in the following optional ON/OFF/control system components:**
- **control via mobile/tablet app:**
 - 2 EV7651 Bluetooth module
 - 2 EV7652 Wi-Fi module
 - or
 - **remote control:**
 - 2 EV7654 Module for remote control
 - 1 EV7663 Single-channel remote control
 - **control via wireless switch:**
 - 2 EV7655 Module for wireless switch
 - 1 EV7667 Black single-channel wireless switch (also comes in white)

Example 3

DEDALO configuration H227,5 wall mounted as pictured.

For lighting , you will need to factor in:

- 6 EV7691 power tracks for uprights 1 (RH side), 2/3 (LH/RH sides), 4 (LH side)
- 6 EV7591 Full-height LED strips for power track H227,5

For the power supply, you will need to factor in:

- 1 EV7607 initial 60W SMART transformer (bay A)
- 2 EV760A intermediate 60W SMART transformers (bays B and C)

To conceal wiring, you will need to factor in:

- 1 ELD534 Cable raceways for bay A

For the 0,8cm shelves at the bottom of bays B and C, use the version with cable raceways

Depending on the preferred control method, you will need to factor in the following optional ON/OFF/control system components:

- control via mobile/tablet app:

- 3 EV7651 Bluetooth module
- 2 EV7652 Wi-Fi module

or

- remote control:

- 3 EV7654 Module for remote control
- 1 EV7663 Single-channel remote control

- control via wireless switch:

- 3 EV7655 Module for wireless switch
- 1 EV7664 White single-channel wireless switch (also comes in black)

Example 4

DEDALO configuration H 270 as pictured.

For lighting , you will need to factor in:

- 2 EV7694 power tracks for uprights 1 (RH side), 2 (LH side)
- 2 EV7572 LED strips for power track H227,9 (approx. 270-36 cm)
- 2 extra charges for LED lights inside storage units for H 129,6
- 10 EV7584 Full-height vertical LED strips for uprights 2 (RH side), 3/4/5/6/7 (LH/RH sides) and 8 (LH side)

For the power supply, you will need to factor in:

- 1 EV7607 initial 96W SMART transformer (bay A)
- 1 EV7606 initial 60W SMART transformer (bay F)
- 4 EV7609 intermediate 60W SMART transformers (bays B, C and D, E)

The configuration is powered by 2 transformer chains: 1 on the LH side and 1 on the RH side, with a break at the corner.

To conceal wiring, you will need to factor in:

- 1 ELD532 Cable raceway for bay A
- 5 ELD304 + ELD534 Bar and cable raceway for bays B, C, D, E, F

Depending on the preferred control method, you will need to factor in the following optional ON/OFF/control system components:

- control via mobile/tablet app:

- 6 EV7651 Bluetooth module
- 6 EV7652 Wi-Fi module

or

- remote control:

- 6 EV7654 Module for remote control
- 1 EV7663 Single-channel remote control

- control via wireless switch:

- 6 EV7655 Module for wireless switch
- 1 EV7667 Black single-channel wireless switch (also comes in white)

FRONT TYPES

Plain front

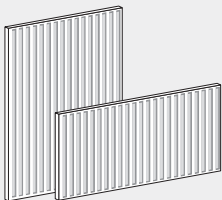

- Materials: 2,2cm-thick veneered or lacquered particleboard, with rounded edging.
- Pattern direction: Horizontal up to H 31,7
Vertical over H 47,7
Wood finish grain always vertical.
- Handles: Handle options are as follows: PUSH-TO-OPEN mechanism, PIN, HOOP, two-tone HOOP, and FILO, see page 42.
- Hinges: Soft-close as standard (except PUSH-TO-OPEN doors)

Module sizes:

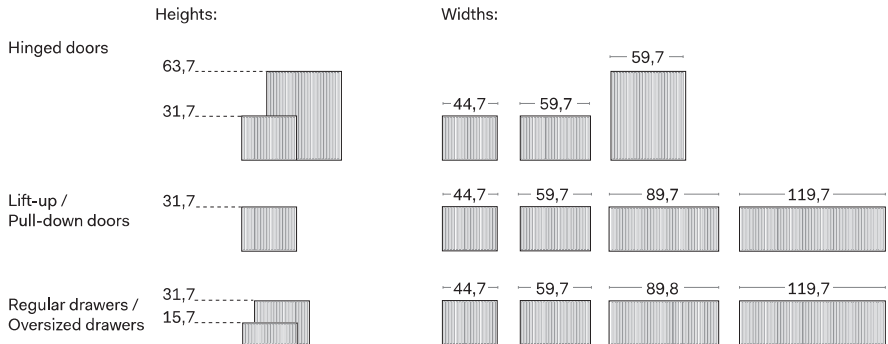

RAYS front

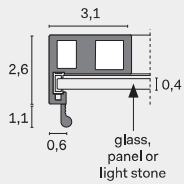

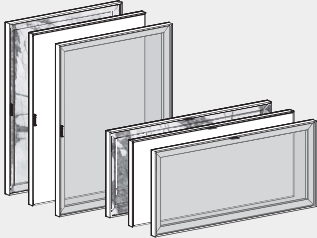

- Materials: Lacquered or veneered pressed wood.
The nature of the material means the inside of the etched groove is inevitably not going to be entirely smooth, hence a slightly uneven effect on the surface of the etched groove should be seen as a distinctive feature of the lacquered door.
- Pattern direction: Vertical.
- Handles: All RAYS fronts feature the PUSH-TO-OPEN mechanism.
No other opening options are possible.

Module sizes:

Framed front

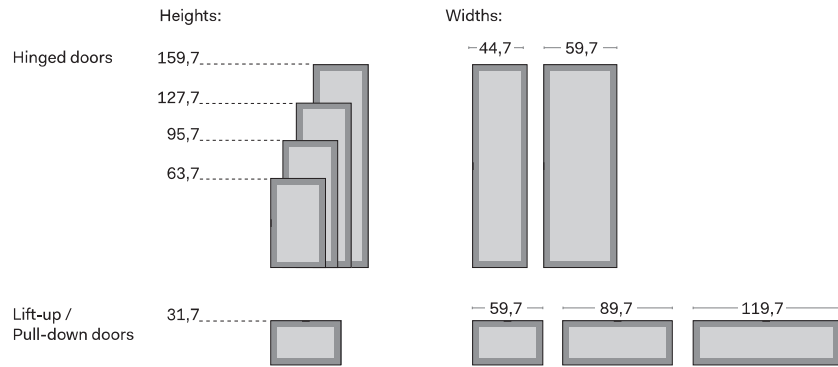

Materials: Extruded aluminium frame either lacquered or faced with wood paired with:
- 0,4cm toughened glass panels with noise seal around edges
- 1,2cm veneered particleboard/lacquered panels
- sheets of Light stone 0,6 cm thick + 0,5cm particleboard.

Pattern direction: On 1,2cm panel front inserts, the pattern is:
- horizontal up to H 31,7
- vertical over H 63,7
- Wood finish grain always vertical

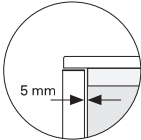

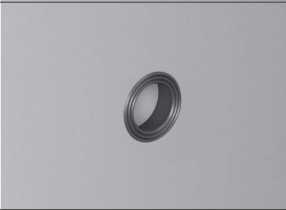

Handles: Bronze-finish handle built into frame.

Hinges: Soft-close as standard.

Module sizes:

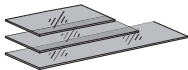

HANDLES

M04		PUSH-TO-OPEN mechanism Available for: - Plain front - RAYS front For the PUSH-TO-OPEN mechanism to work, there must be a gap of a few millimetres between the front and the carcass. When dealing with drawers and oversized drawers, this gap is 5 mm. Detail of storage unit with PUSH-TO-OPEN drawer or oversized drawer.	
M49		PIN Dimensions Ø 5x20 mm Available for: - Plain front	Finishes Chrome Bronze White
M53		HOOP Dimensions Ø 37 mm Available for: - Plain front	Finishes Matt lacquered / Oxidized lacquered Extra charge + 57

SUSTAINABILITY AND CERTIFICATIONS

A solid tradition, specialized know-how and an unwavering innovation-oriented focus - in the spirit of a sustainable culture - are the values that shape the quality and the creativity of Novamobili's designs.

Recognizing employee and environmental health and safety as a priority, we have adopted an integrated management system in our workplaces based on standards UNI EN ISO 14001 and UNI ISO 45001. These certifications are the product of Novamobili's commitment to maintaining the best possible conditions for all workers who operate in or on behalf of the company and to constantly assessing the impact that each activity carried out, whether directly or indirectly, might have on the environment. In line with our policy of continually improving sustainability and environmental protection, we have opted to use environmentally compatible materials like panels that have the international certification Carb2 (California Air Resources Board) and materials sourced from FSC®-certified supply chains, which ensure that wood used to make our products comes from responsibly managed forests. Becoming certified to UNI EN ISO/IEC 27001 was another important step for Novamobili, demonstrating our focus on information security and commitment to protecting the data of customers and partners alike, seeking compliance with one of the most recognized international information security standards.

Sustainable growth and the implementation of an environmentally conscious approach to safeguard our precious natural heritage are two of the challenges that Novamobili sets itself every day. This is why we have our own self-imposed rules in place to ensure the use of environmentally compatible materials and sustainable coating processes: Novamobili was one of the first companies to use water-based paints and, in line with its policy of continuous improvement, has switched to using organic water-based paints for most of its lacquered finishes. The use of organic water-based UV coatings results in an annual reduction in CO2 emissions into the atmosphere of around 8,5 tonnes, which is the equivalent of a car driving for approx. 73,000 km, namely around the world 1.8 times. Novamobili is committed to further reducing the environmental impact of our products and production processes. An important contribution for the wellbeing and future of us all, because sustainable management in the manufacturing of a quality product not only respects the planet's resources, but also creates a lasting value and brings benefits to all those involved in the company's activities, whether directly or indirectly, from customers to workers.

EAC CERTIFICATION

Novamobili quality is certified in compliance with the Eurasian Union technical regulations.

INFORMATION

FSC® CERTIFICATION

The mark of
responsible forestry

With a focus on constantly improving sustainable development and protecting our environmental heritage, the company decided to use FSC® certified material for its wood and wood derivative based products, sourced from forests managed according to the environmental, social and economic principles set out by the Forest Stewardship Council®. Ask info@novamobili.it if the product you are interested in is FSC® certified. Protecting forests means protecting the environment we inhabit and preserving it for future generations.

COMPONENTS

IEC/ISO 27001 CERTIFICATION

ISO/IEC 27001 certification is the leading international standard focused on information security, published by the International Organization for Standardization (ISO) in collaboration with the International Electrotechnical Commission (IEC).

Becoming an ISO/IEC 27001-certified company is a huge milestone for Battistella spa in its current business journey. This internationally recognized certification attests that an effective Information Security Management System (ISMS) has been implemented. Gaining this certification is not just a matter of filling out the paperwork, it is a strategic investment that brings real-world benefits. It demonstrates a real commitment to protecting data and information — both the company's own and those of customers — boosting trust and the company's market reputation.

In these times of ever-increasing cybersecurity threats, ISO/IEC 27001 certification offers a structured framework for identifying, assessing and handling risks relating to information security, ensuring operational continuity and compliance with current standards like GDPR. In addition, it can be a significant competitive advantage, opening up new business opportunities and smoothing the way into the more security-conscious markets. To sum up, ISO/IEC 27001 certification is not just a guarantee of security: for the company, it is an actual driver of growth and trustworthiness.

STORAGE
UNITS

ISO 14001 CERTIFICATION

ISO 14001 certification is an international standard that sets out requirements for an Environmental Management System (EMS) and attests to our commitment to managing our environmental impact more effectively through a systematic continuous improvement approach. The goal is to prevent pollution, optimize use of resources and improve our company's overall environmental performance.

UNI ISO 45001 CERTIFICATION

ISO 45001 certification is the international standard for Occupational Health and Safety Management Systems (OHSMS). It provides a structured framework that seeks to prevent accidents and occupational diseases, promote safe and healthy workplaces and proactively improve health and safety performance. One of Novamobili's goals is to integrate health and safety management into everyday company processes, actively engaging both management and workers, to identify, assess and control risks, thus ensuring a reduction in accidents and an increase in overall wellbeing.

SUSTAINABILITY AND CERTIFICATIONS

SUSTAINABILITY REPORT

Battistella Company — which Novamobili spa is part of — presented its first Sustainability Report in 2024. This document highlights the Group's commitment to social responsibility and environmental protection: two values that have been cornerstones of the Group since its inception and that have been built on over time with a growing focus on sustainability in line with ESG (Environmental, Social and Governance) principles.

The Report is founded on two main pillars: care for employees, local communities and the local region; and management of environmental impact.

Care for people is of paramount importance, espousing the principles of respect, fairness and merit. Our best practices include a voluntary time bank, scholarships, additional welfare benefits and a special focus on a healthy work-life balance. Various initiatives tie in with this mission, including "Progetto 90", which aims to find jobs for young talent in line with company values, and "Punto di Ascolto", which offers psychological support. Having strong ties to its local community, Battistella Company creates local jobs and supports culture, education and sport.

Managing our environmental impact translates into recovering scrap wood for use as a raw material or as a source of energy, automating to reduce waste, and the use of recyclable packaging.

Our corporate strategy hinges on keeping all manufacturing in Italy using leading suppliers, employing certified recycled wood, organic water-based coatings and fully traceable quality materials.

Ethics inform every company decision, all of which are geared towards reducing our environmental impact and ensuring occupational health and safety, defining continual improvement goals for responsible future growth.

CODE OF ETHICS

In 2025, we published our company Code of Ethics, which for Battistella Company — the holding company behind Novamobili — is a key document that sets out the principles and moral values that inform the actions of everyone who works in the company as well as independent contractors, from employees to managers, through to our business partners. It serves to outline expectations in terms of integrity, honesty, respect, transparency and social responsibility. This code is not just a set of rules, but an actual statement of intent that seeks to foster a fair and respectful work environment, prevent unethical behaviour such as discrimination or corruption, and ensure that we, as a company, operate sustainably and responsibly in our dealings with stakeholders and society in general.

SOCIALLY COMMITTED

Novamobili spa is a gold sponsor of ATL-Etica, the first non-profit amateur sports club to become a third sector organization (TSO), committed to inclusion, sport and community initiatives. As a registered third sector organization, it ensures everybody has the right to enjoy sport, breaking down financial barriers and encouraging synergy between different institutions. ATL-Etica promotes inclusive sport and wellbeing through social services (disability inclusion, community services, raising awareness around food), health initiatives (medical and rehab centres), education (supporting inclusive schools, AI), cultural activities (educational videogames), integration in the workplace (digital) and amateur sports (athletics, inclusive gymnastics). The company has been acclaimed for supporting special projects such as "Articolo 33" (access to sport and care for the vulnerable), "Enterprise" (specially equipped minibuses), "Minerva" (videogame teaching values), "Bar Etico" (inclusive food service) and "Riga Dritto!" (raising awareness around lawfulness).

We have strong ties to the local community: in addition to the obvious job opportunities created in the local region and supporting culture and education with scholarships, we promote a healthy lifestyle through our sports sponsorships, such as our ongoing partnership, since 2019, with the Nutribullet Treviso Basket team, which plays in Italy's Serie A basketball league.

TERMS AND CONDITIONS OF SALE

1. PRODUCT AND PRICE LIST

The prices herein are given in euros (€) and are retail prices excluding VAT.

Novamobili Spa does not accept any responsibility for misprints and/or mistakes in describing the characteristics of the products.

The dimensions featured herein are nominal and are given in centimetres.

Each new price list supersedes all previous editions.

2. TECHNICAL CHANGES

The technical specifications herein are indicative and **Novamobili Spa** reserves the right to alter them at any time and make improvements or changes, in its sole discretion, with a view to achieving better product quality.

3. ORDERS AND DELIVERIES

Novamobili Spa reserves the right, in its sole discretion, to not accept orders from customers that are not in line with the company's instructions.

The terms of delivery given on the order confirmation are indicative and expressed in working days. No damages can be claimed in the event of delays, suspensions or cancellations of deliveries.

Orders may only be changed or cancelled within one week of their receipt: this also applies to partial changes. The value of the goods will be charged should orders be cancelled when the goods are already in production and/or ready to be delivered.

The goods are delivered free to your warehouse unless a business agreement states otherwise.

4. TERMS OF PAYMENT

The terms of payment are the terms indicated on the order confirmation according to the contractual arrangements made with the Customer.

In the event of non-payment or delayed payment, partial or otherwise, **Novamobili Spa** shall be entitled to stop or cancel any orders or deliveries in progress.

5. CLAIMS AND COMPLAINTS

Delivery by the carrier and receipt of the goods without complaint constitutes evidence that the goods delivered precisely match the goods ordered.

Any discrepancies must be detected by the customer when the goods are in the process of being handed over and must be reported in writing to the carrier, otherwise the complaint cannot be accepted.

Any complaints about the quality of products must be submitted in writing to **Novamobili Spa** within eight days of receiving the goods or the complaint cannot be accepted.

6. WARRANTY

In the event of defects in the goods attributable to **Novamobili Spa**, the relevant current European regulations shall apply.

The company disclaims all responsibility regarding assembly of the products.

Novamobili Spa disclaims liability for damage resulting from failure to comply with the assembly instructions and/or from incorrect installation.

7. INSTALLATION AND SAFETY

The product comes with technical information on assembly and installation. The instructions and warnings provided by the manufacturer must be strictly adhered to if the product is to be installed correctly and safe to use. **Novamobili** is in no way liable in the event of failure by the installer tasked by the customer or the end consumer to comply with assembly and installation instructions and warnings, or to carry out the work properly.

8. CHANGES IN SHADE AND COLOUR

Wood, lacquered colours, fabrics, leather and other materials can be susceptible to colour change over time: if you wish to purchase items at a later date to add to your original order, any such variation cannot be cause for complaint.

9. RETURNS

Returns of goods will not be accepted unless authorized beforehand in writing by **Novamobili Spa**, who shall be entitled to inspect the goods in each case.

Under no circumstances can we accept returns of cut-to-size products.

Approved returns shall be made on a carriage paid basis and the refund you are entitled to shall be the invoice price minus any amount for deterioration or damage to the materials returned that cannot be attributed to **Novamobili Spa** resulting from transport, packaging, handling of the products or use thereof.

10. RESERVATION OF OWNERSHIP CLAUSE

Ownership of the goods shall be retained by **Novamobili Spa** until the price has been paid in full, even if further work is done on the products after delivery.

The purchaser is authorized to sell the goods to third parties as part of its normal business, but in this event, however, it is understood that any payments due to the original purchaser are automatically payable to **Novamobili Spa** until the goods are fully paid for.

In the event of non-payment, **Novamobili Spa** will be entitled, in its absolute discretion, to invoke the reservation of ownership clause and have the goods returned, charging the customer all costs and expenses associated with their disassembly, transport and return, with it being understood that **Novamobili Spa** will still be entitled to claim for further damages.

11. APPLICABLE LAW AND JURISDICTION

The sale contract is governed solely by the laws of Italy.

The parties submit to the exclusive jurisdiction of the Italian Court, more specifically the Court of Treviso, for the purpose of any dispute arising out of or in connection with the sale contract and, in general, business conducted with **Novamobili Spa**.

12. PRIVACY POLICY

For the intents and purposes of the Italian Privacy Act (D.Lgs.) 196/03 and EU Regulation no. 2016/679 – General Data Protection Regulation – **Novamobili Spa** hereby declares that personal customer data in any way associated with their dealings with **Novamobili Spa** shall be processed in compliance with legal obligations and only for the purpose of fulfilling contractual obligations.

Said data may be shared with third parties if and when required for the performance of the contracts themselves.
