Pomice

A03  
Arena

A02  
Fumo

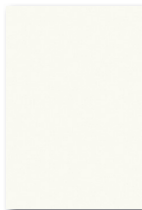

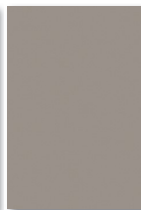

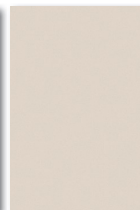

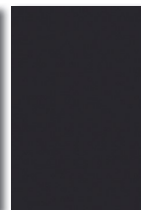

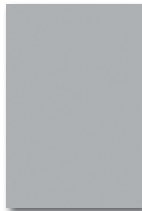

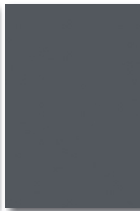

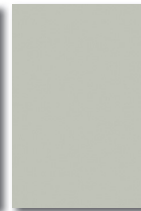

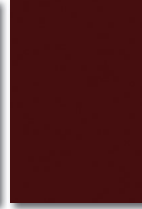

A05  
Lapis

### Clay coating

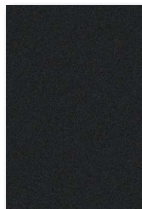

The surface is coated by hand with three coats of clay, which are allowed to dry naturally after each application. The clay mixture is made from a blend of cement and different earths, resulting in "natural" colours and finishes. This handcrafted approach really brings out the clay's colour and tactile qualities, creating a pattern of tonal shades across the surface.

The oxidized lacquered finish is composed of paint containing metal crystals. Any small shiny particles present on large surfaces should be seen as a distinctive feature of the finish.

RAYS

|                                                                                     |                                                                                     |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |
| Matt lacquered<br>in all finishes                                                   | Oxidized lacquered<br>in all finishes                                               |

RAYS fronts are produced on a pressed wood substrate. The nature of the material means the inside of the etched groove is inevitably not going to be entirely smooth, hence a slightly uneven effect on the surface of the etched groove should be seen as a distinctive feature of the lacquered door.

Refer to the pages inside the price list to check what finishes are available for each item.  
Printed samples used to illustrate finishes and colours may not represent the true colour; they are given as a rough guide only and may not match the product actually sold.

308  
Brass

309  
Brown

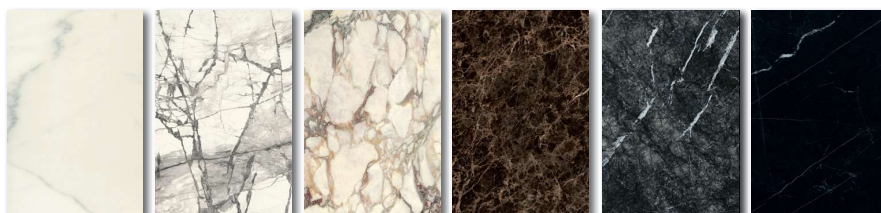

302  
Tin

Finishes available for metal items only.

The metal lacquered finish serves up a special coating technique involving various coats of paint applied entirely by hand that are combined to achieve a metallic effect. This is a handcrafted product, and is therefore unique, meaning any differences in colour or in gloss level on different surfaces should be seen as a distinctive feature of the finish.

# LIGHT STONE, MARBLE AND LAVA STONE

### IMPORTANT INFORMATION

**Marble is a natural product and, as such, no two pieces are the same in colour and pattern. It is this very non-replicable quality that makes your top exclusive.**

#### BIANCO CARRARA

White marble, with a granulated sugar-like texture and grey/dark-grey veining. It may feature small pits or crystalline inclusions varying in size. This material has a good degree of cohesion and does not require resining. Whitish or yellowish veins may be visible, mostly due to the presence of silica impurities. Natural fissures are commonly encountered in the marble; they run in a different direction to that of the sedimentation that formed the rock and appear as fine lines or fissures. In this marble, veins can give the surface a flow, further enhancing its appearance.

#### VERDE GUATEMALA

This rock is a member of the ophite group. The predominant mineral is olivine, which gives it its dark green colour. It contains random patterns of additional minerals that produce white inclusions, usually clustered in mottled patches. This material's distinctive vitreous structure means it does not have as much of a "mirror finish" as other marbles when polished. The green colour seen in a slab varies in intensity and distribution, clustered in different concentrations and shapes featuring irregular outlines.

#### GRIGIO ORIENTE

Tobacco-coloured marble featuring a thread-like pattern running in no dominant direction. It features a discontinuous pattern of white or white/rust-brown veins, occasionally with metallic inclusions that appear as shimmering bronze/gold-coloured patches. These are due to the presence of siderite and often measure more than a centimetre across. Patches of more porous material are widespread throughout this marble and are remedied by resining and filling the exposed side of the top. Resining is required to improve the material's cohesion, while filling is done to correct these "softer" parts of the surface, which can vary in size. Consequently, resin and filling procedures should be seen as an inevitable part of the processing of this marble. As a result of the process, light can bounce off the treated areas of the polished surface differently when viewed against the light.

#### LAVA STONE

Lava stone is a rock formed as a result of a volcanic eruption. It owes its origin and shape to deposits of volcanic ash, sand and lapilli. It has a basically microcrystalline structure and the honed surface shimmers with microscopic cavities that can be seen with the naked eye when light shines across it. Its base colour is mainly grey with dark patches, the latter arranged in a "sprinkled" pattern or clustered in veins, with a brushstroke-like effect and appearance. It is not unusual, depending on the weights and predominance of certain individual minerals over others, to see inclusions ranging in colour from white to ochre yellow, denoting individual crystals, or streaks, which can look like abrasions. The mineral responsible for the ochre yellow colour is iron, while the white colouring comes from magnesium, calcium, sodium, etc.

Refer to the pages inside the price list to check what finishes are available for each item.

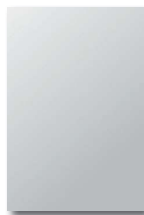

Printed samples used to illustrate finishes and colours may not represent the true colour; they are given as a rough guide only and may not match the product actually sold.

# USE AND CARE INSTRUCTIONS

Please find below some useful tips on how to care for the product and keep it looking its best.

## CHANGES IN SHADE AND COLOUR

Lacquered colours and veneers can be susceptible to colour change over time and hence, when ordering new pieces to match existing units, any difference in colour shall not constitute cause for complaint.

It is also advisable to position furniture away from strong sources of heat and out of direct sunlight.

## HOW TO CLEAN SURFACES IN GENERAL

Use a soft cloth (moistened where necessary). Do NOT, under any circumstances, use abrasive products, solvents, thinners, alcohol or corrosive products. Do not leave wet cloths touching surfaces.

## HOW TO CLEAN GLASS

Use a soft cloth and glass cleaner. Do NOT, under any circumstances, use abrasive products, solvents, thinners, alcohol or corrosive products.

## HOW TO CLEAN CLAY

Use a soft cloth moistened with water and mild detergents. Do not clean surfaces with methylated spirits, which can leave hard-to-remove marks as it dries. Do not clean the surface with products containing bleach, or any other products with a highly basic pH as their prolonged application can result in a white sheen. Other products that can damage the surface include trichloroethylene, industrial solvents, hydrofluoric acid, caustic soda, and paint thinners.

## ELECTRICAL ACCESSORIES

All such accessories come with "CE" marking attesting to their compliance with EEC directives (EEC 72/23, EEC 89/336). In addition, they meet Italian CEI electrical safety standards (CEI 34-21 and EN 60598.1).

Each pack comes with an assembly instruction sheet featuring the system's technical specifications and essential installation procedure, which is to be carried out, whatever the case, by qualified personnel only.

## INFORMATION ON FABRICS

For fabric characteristics (composition, care), see relevant notes on pattern book (NB: samples are indicative, fabrics are not pre-washed).

The metres given in the price list for customer's fabric refer to plain coloured fabrics.

Take into account that striped or patterned fabrics will require a larger quantity.

For information on the fabrics' composition and care, we advise scanning the QR code shown here, which will take you to the relevant page.

 FJORD sideboard (shelf only on sideboard H 121,3)  
 FLOAT sideboards (top cover and shelves)  
 STRIPE sideboards (top cover and shelves)

Finish:

- Oxidized bronze

1 Rack

**Code**  
**HV0030** 18

## CONTROL MODULES for sideboards with light

Choose the module for the ON/OFF control system you want.

|  |                           |                              |    |
|--|---------------------------|------------------------------|----|
|  | Bluetooth module          | <b>Code</b><br><b>HV7651</b> | 42 |
|  | Wi-Fi module              | <b>Code</b><br><b>HV7652</b> | 71 |
|  | Module for remote control | <b>Code</b><br><b>HV7654</b> | 30 |

## REMOTE CONTROL

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, from up to 14 metres away. Controls an unlimited number of SMART transformers.

Single channel: for controlling all transformers together (unlimited).

|                               |               |    |
|-------------------------------|---------------|----|
|                               | <b>Code</b>   |    |
| Single-channel remote control | <b>HV7663</b> | 60 |

Multi-channel: (max. 3) for controlling up to 3 groups of transformers; each channel can have an unlimited number of transformers.

**Each SMART transformer you plan to control must have a module for remote control.**

|                              |               |    |
|------------------------------|---------------|----|
|                              | <b>Code</b>   |    |
| Multi-channel remote control | <b>HV7662</b> | 85 |

## Switch-on via BLUETOOTH and WI-FI

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, straight from a smartphone or tablet using the relevant app. Depending on the technology used (Bluetooth or Wi-Fi), all available functions can be used.

Using Bluetooth technology, you can switch lights on and off and control the lighting level straight from 1 smartphone or 1 tablet. The app can be installed on a number of devices, but only allows lights to be controlled by 1 of these at a time. Up to 5 Bluetooth modules can be paired with the app.

**Each SMART transformer you plan to control (max. 5) must have a Bluetooth module.**

Using your home's Wi-Fi network, you can switch lights on and off and control the lighting level straight from 1 or more smartphones or tablets using the relevant app. In addition, the transformer interfaces with Amazon Alexa or Google Home voice-control devices.

The app is free and available for all mobile operating systems.

**Each SMART transformer you plan to control must have a Wi-Fi module.**

## Smart accessories for ASTRID and DEEP mirror with light

The SMART transformer can be integrated with modules for remote control via apps with Bluetooth or Wi-Fi technology.

### CONTROL MODULES

Choose the module for the ON/OFF control system you want.

|                           | Code          |    |
|---------------------------|---------------|----|
| Bluetooth module          | <b>HV7651</b> | 42 |
| Wi-Fi module              | <b>HV7652</b> | 71 |
| Module for remote control | <b>HV7654</b> | 30 |

### REMOTE CONTROL

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, from up to 14 metres away. Controls an unlimited number of SMART transformers.

Single channel: for controlling all transformers together (unlimited).

|                               | Code          |    |
|-------------------------------|---------------|----|
| Single-channel remote control | <b>HV7663</b> | 60 |

Multi-channel: (max. 3) for controlling up to 3 groups of transformers; each channel can have an unlimited number of transformers.

**Each SMART transformer you plan to control must have a module for remote control.**

|                              | Code          |    |
|------------------------------|---------------|----|
| Multi-channel remote control | <b>HV7662</b> | 85 |

### Switch-on via BLUETOOTH and WI-FI

Switches lights connected to the SMART transformer on and off, and also controls the lighting level, straight from a smartphone or tablet using the relevant app. Depending on the technology used (Bluetooth or Wi-Fi), all available functions can be used.

Using Bluetooth technology, you can switch lights on and off and control the lighting level straight from 1 smartphone or 1 tablet. The app can be installed on a number of devices, but only allows lights to be controlled by 1 of these at a time. Up to 5 Bluetooth modules can be paired with the app.

**Each SMART transformer you plan to control (max. 5) must have a Bluetooth module.**

Using your home's Wi-Fi network, you can switch lights on and off and control the lighting level straight from 1 or more smartphones or tablets using the relevant app. In addition, the transformer interfaces with Amazon Alexa or Google Home voice-control devices.

The app is free and available for all mobile operating systems.

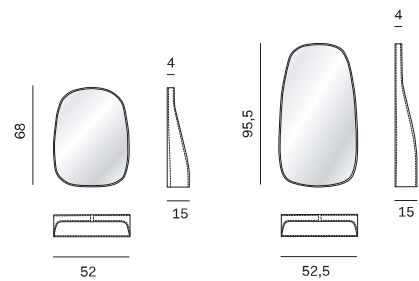

**Each SMART transformer you plan to control must have a Wi-Fi module.**

## ENVIRONMENT AND SAFETY

---

A solid tradition, specialized know-how and an unwavering innovation-oriented focus - in the spirit of a sustainable culture - are the values that shape the quality and the creativity of Novamobili's designs.

Recognizing occupational and environmental health and safety as a priority, Novamobili has adopted an integrated management system in its workplaces. The integrated system, according to standards UNI EN ISO 14001 and UNI ISO 45001, is the product of Novamobili's commitment to maintaining the best possible conditions for all workers who operate in or on behalf of the company and to constantly assessing the impact that each activity carried out, whether directly or indirectly, might have on the environment. This commitment has led us to become environmentally certified to UNI EN ISO 14001. Novamobili furniture uses panels with international certification CARB 2 (California Air Resources Board).

Sustainable growth and the implementation of an environmentally conscious approach to safeguard our precious natural heritage are two of the challenges that Novamobili sets itself every day. This is why we have our own self-imposed rules in place to ensure the use of environmentally compatible materials and sustainable coating processes: Novamobili was one of the first companies to use water-based paints and, in line with its policy of continuous improvement in terms of environmental protection, completed the transition to organic water-based paints in 2023. The use of water-based organic UV paints has resulted in an annual reduction in CO2 emissions into the atmosphere of around 8,5 tonnes, which is the equivalent of a car driving for approx. 73,000 km, namely around the world 1.8 times. Novamobili is committed to further reducing the environmental impact of our products and production processes. An important contribution for the wellbeing and future of us all, because sustainable management in the manufacturing of a quality product not only respects the planet's resources, but also creates a lasting value and brings benefits to all those involved in the company's activities, whether directly or indirectly, from customers to workers.

EAC CERTIFICATION

Novamobili quality is certified in compliance with the Eurasian Union technical regulations.

FSC® CERTIFICATION

With a focus on constantly improving sustainable development and protecting our environmental heritage, the company decided to use FSC® certified material for its wood and wood derivative based products, sourced from forests managed according to the environmental, social and economic principles set out by the Forest Stewardship Council®. Ask [info@novamobili.it](mailto:info@novamobili.it) if the product you are interested in is FSC® certified. Protecting forests means protecting the environment we inhabit and preserving it for future generations.

# TERMS AND CONDITIONS OF SALE

---

## 1. PRODUCT AND PRICE LIST

The prices herein are given in euros (€) and are retail prices excluding VAT.

**Novamobili Spa** does not accept any responsibility for misprints and/or mistakes in describing the characteristics of the products.

The dimensions featured herein are nominal and are given in centimetres.

Each new price list supersedes all previous editions.

## 2. TECHNICAL CHANGES

The technical specifications herein are indicative and **Novamobili Spa** reserves the right to alter them at any time and make improvements or changes, in its sole discretion, with a view to achieving better product quality.

## 3. ORDERS AND DELIVERIES

**Novamobili Spa** reserves the right, in its sole discretion, to not accept orders from customers that are not in line with the company's instructions.

The terms of delivery given on the order confirmation are indicative and expressed in working days. No damages can be claimed in the event of delays, suspensions or cancellations of deliveries.

Orders may only be changed or cancelled within one week of their receipt: this also applies to partial changes. The value of the goods will be charged should orders be cancelled when the goods are already in production and/or ready to be delivered.

The goods are delivered free to your warehouse unless a business agreement states otherwise.

## 4. TERMS OF PAYMENT

The terms of payment are the terms indicated on the order confirmation according to the contractual arrangements made with the Customer.

In the event of non-payment or delayed payment, partial or otherwise, **Novamobili Spa** shall be entitled to stop or cancel any orders or deliveries in progress.

## 5. CLAIMS AND COMPLAINTS

Delivery by the carrier and receipt of the goods without complaint constitutes evidence that the goods delivered precisely match the goods ordered.

Any discrepancies must be detected by the customer when the goods are in the process of being handed over and must be reported in writing to the carrier, otherwise the complaint cannot be accepted.

Any complaints about the quality of products must be submitted in writing to **Novamobili Spa** within eight days of receiving the goods or the complaint cannot be accepted.

## 6. WARRANTY

In the event of defects in the goods attributable to **Novamobili Spa**, the relevant current European regulations shall apply.

The company disclaims all responsibility regarding assembly of the products.

**Novamobili Spa** disclaims liability for damage resulting from failure to comply with the assembly instructions and/or from incorrect installation.

## 7. CHANGES IN SHADE AND COLOUR

Wood, lacquered colours, fabrics, leather and other materials can be susceptible to colour change over time: if you wish to purchase items at a later date to add to your original order, any such variation cannot be cause for complaint.

## 8. RETURNS

Returns of goods will not be accepted unless authorized beforehand in writing by **Novamobili Spa**, who shall be entitled to inspect the goods in each case.

Under no circumstances can we accept returns of cut-to-size products.

Approved returns shall be made on a carriage paid basis and the refund you are entitled to shall be the invoice price minus any amount for deterioration or damage to the materials returned that cannot be attributed to **Novamobili Spa** resulting from transport, packaging, handling of the products or use thereof.

## 9. RESERVATION OF OWNERSHIP CLAUSE

Ownership of the goods shall be retained by **Novamobili Spa** until the price has been paid in full, even if further work is done on the products after delivery.

The purchaser is authorized to sell the goods to third parties as part of its normal business, but in this event, however, it is understood that any payments due to the original purchaser are automatically payable to **Novamobili Spa** until the goods are fully paid for.

In the event of non-payment, **Novamobili Spa** will be entitled, in its absolute discretion, to invoke the reservation of ownership clause and have the goods returned, charging the customer all costs and expenses associated with their disassembly, transport and return, with it being understood that **Novamobili Spa** will still be entitled to claim for further damages.

## 10. APPLICABLE LAW AND JURISDICTION

The sale contract is governed solely by the laws of Italy.

The parties submit to the exclusive jurisdiction of the Italian Court, more specifically the Court of Treviso, for the purpose of any dispute arising out of or in connection with the sale contract and, in general, business conducted with **Novamobili Spa**.

## 11. PRIVACY POLICY

For the intents and purposes of the Italian Privacy Act (D.Lgs.) 196/03 and EU Regulation no. 2016/679 – General Data Protection Regulation – **Novamobili Spa** hereby declares that personal customer data in any way associated with their dealings with **Novamobili Spa** shall be processed in compliance with legal obligations and only for the purpose of fulfilling contractual obligations.

Said data may be shared with third parties if and when required for the performance of the contracts themselves.
